Kaiser Partner Privatbank Invests during Coronavirus Year and Continues Path of Growth

Annual Report of the Chairman of the Board of Directors and the Board of Management of Kaiser Partner Privatbank

2020 was a special year also for Kaiser Partner Privatbank, accompanied by many challenges and opportunities. Our clients continued to place their trust in us even during one of the greatest crises of recent history. Despite the difficult environment, organic growth allowed client assets to grow by CHF 0.3 billion (+6%) to CHF 5 billion. In addition, the private bank was able to achieve excellent performance for its clients in asset management in markets that were volatile and torn by crises.

Total revenues grew by 9% to CHF 27.2 million in 2020. Commission and service income contributed roughly CHF 16.6 million to this, the same level as the previous year, and financial transactions contributed CHF 5.6 million (+33%). In the interest business, the Bank suffered a decline of 15% to CHF 4.6 million due to the cyclical interest rate cuts in March 2020 of approximately 2% by central banks, in particular by the Federal Reserve (Fed). With increased investments in digital initiatives and personnel as well as additional costs associated with the pandemic, operating expenses rose by 20% to CHF 21.1 million. This meant that net income for the year fell by CHF 2 million (previous year CHF 4 million).

Due to strong organic growth, profitability had already improved significantly in the second half of the year, and we expect earnings growth to continue from pre-crisis levels in 2021 and in the coming years.

Crisis Management Is More than Just Coping with Crises

We established a COVID-19 Task Force early in 2020. It closely monitored the situation not only from the point of view of epidemiology but also from an economic, political, and social perspective. Thanks to our operational coronavirus policy that was rapidly and systematically implemented, we succeeded in very quickly setting up a “split operations” system with location-independent, secure access to the systems together with our partner 21iLab. On this basis, we protected our employees while offering our clients the high level of uninterrupted service they have become accustomed to. Thanks to our long-term approach to investment geared toward sustainability, our clients’ assets were protected from major losses during the price distortions in March and April 2020. The performance of our mandates, which compares favorably with that of our competitors, also demonstrates our success in this endeavor. We should mention in particular that the Kaiser Partner Privatbank Pension Fund recorded the highest performance of all pension funds in the country. We have thus done more than manage the consequences of the pandemic and its economic fallout; we made the best of the crisis for our employees and clients.

Opportunities in the Pandemic: Reinventing the Bank

For Kaiser Partner Privatbank, 2020 was also a year in which we sought opportunities even more actively than usual – loosely in accordance with the words of wisdom of Winston Churchill: “Never waste a good crisis.” For example, during the market turmoil in the spring, we actively developed investment proposals for our clients to allow them to hedge their portfolios and launched a new minimum volatility mandate, enabling us to offer investment opportunities for clients during the crisis. Through the joint effort of several of our units, we also succeeded in winning the mandates of charitable foundations that are highly respected in the border triangle region. In this way, we tapped into a new market by consolidating and further developing our many years of expertise in the area of sustainability. As a signatory of the UN Principles for Responsible Investment (PRI, 2009) and the UNEP FI Principles for Responsible Banking (PRB, 2019), we adhere to the clear conviction that we will get better investment results by taking holistic sustainability criteria into account in our investment decisions, including the prioritization of environmental, social, and corporate governance (ESG) principles. At the same time, we also live up to our responsibility to the environment for the sake of future generations.

We are now actively serving our external asset management clients by contributing this expertise, which has also allowed us to achieve significant growth. Our product and service range is growing all the time and includes custody services, proprietary trading, fund services, securitization, digital interfaces, and tailored services such as custom brokerage solutions. We generated strong growth with existing and new clients in the area of securitization and custody for funds, further expanding our very successful network of external asset managers through initiatives that included a multiphase digital campaign. All of this was possible because we actively invested in understanding our clients' needs and identifying opportunities for them in 2020. In the years to come, we will expand and institutionalize these approaches so that we can further accelerate our growth trajectory.

Recognized as Liechtenstein's Best Private Bank

The values we convey, our holistic wealth management model, our renunciation of retrocession fees and embrace of sustainable pricing, the way we protect privacy in an increasingly digital environment, and our responsible methods of investment demonstrate that we are attractive to ever more clients and that all of this has a positive effect on our reputation. We are pleased that these values have also been honored accordingly in the latest rating by *World Finance* and that our company has once again been named Liechtenstein's Best Private Bank.

A Look Back on 2020: A Year for the History Books

"Everything Centered around the Home"

Every year makes history in its own unique way, but 2020 – as the coronavirus year – is likely to find a very special place in the history books and be remembered by everyone for a very long time to come. Starting in China, the coronavirus spread throughout the world in a matter of weeks, disrupting not only our daily routines but also business in general. World trade came to a temporary halt, and business meetings suddenly began to be held using videoconferencing (which soon became a matter of course). The pandemic accelerated several long-term trends, particularly within the scope of the digital transformation. Working from home, shopping online, and watching movies in your home using video streaming services – everything is now centered around the home, although this is probably (and hopefully) not going to be the case forever. However, these very things are now an integral part of life for a large segment of the population, and the term "social distancing" has also been on everyone's lips since last year.

The Economic Crisis Shifts Policymaking to Center Stage

The health crisis also brought about economic winners in the wake of the associated digital transformation wave, namely in the technology sector. However, the majority of sectors and industries were on the losing side of this revolution in 2020, at least for a brief period of time. Tourism is among the sectors that suffered the most and that continues to suffer from the COVID-19 crisis; this includes the airline industry, hotels and restaurants, and the leisure sector. On the other hand, industry in general also initially experienced a profound slump, but it was able to significantly recover from the second half of the year onwards. This was not least due to high demand from China, which implemented drastic measures to bring the pandemic under control relatively quickly. While the industrialized countries slipped into recession and the global economy slumped by -3.4% last year (as per OECD estimates), China was already on track for growth as of the second quarter of 2020 following a sharp downturn at the beginning of the year. The Chinese economic engine was so strong that capacity on container ships on the world's oceans were under strain again in the fall, and chip factories began to report production bottlenecks. However, shadows predominated on the economic front alongside such bright spots. In the United States, the unemployment rate rose to almost 15% at times, but the policy response was swift and comprehensive – far exceeding the economic support measures taken during the 2008 financial crisis. The US government passed two stimulus packages that totaled more than USD 3 trillion during the year, including stimulus checks for large segments of the population. Mitigating the economic damage was the top priority in Europe as well, with rising mountains of debt being pushed aside for the time being. In addition to each of the multi-billion euro economic stimulus programs of the individual European countries, the response to the economic crisis in terms of fiscal policy also included a EUR 750 billion reconstruction fund for the regions and economic sectors suffering the most harm.

A Downhill and Uphill Ride on the Financial Markets

With a gain of more than 13%, the MSCI World Index posted double-digit gains in the coronavirus year. Anyone who looked solely at the year-end statement for their investment portfolio but did not otherwise pay attention to the financial markets could easily overlook how turbulent things were during the year. Investors were forced to accept a correction of more than 30% in just five weeks – making it the fastest bear market of all time. Volatility was also a constant companion, with prices on Wall Street rising or falling by more than 1% on more than 110 days, that is, on almost every second trading day. Once again, the impetus for a V-shaped reversal in prices starting at the end of March and one of the strongest stock market rallies of all time was the central banks. Anyone who thought that their monetary policy powder was no longer dry given the already record-low interest rates and huge purchases of securities in the past was proven wrong. As the last year demonstrated, more can always be done. For example, the Fed created a half-dozen vehicles to not only purchase government bonds but also mortgage and corporate bonds, nipping any liquidity shortages in the bud. The Fed also purchased several trillion US dollars worth of securities. Central bankers in other countries took similar levels of action, with interest rates being cut wherever possible and central bank balance sheets continuing to grow.

Trump (Reluctantly) Leaves the White House

Due to the density of the events that took place during the pandemic year, many of the important things that happened quickly degenerated into footnotes when viewed in the rearview mirror. This would include Brexit, the formalities of which the United Kingdom and the European Union (EU) agreed upon at the last minute, with conclusion of the final treaty just as 2021 began. On the other hand, Donald Trump is likely to be remembered longer – as a constantly tweeting president who was the first in United States history to face two impeachment proceedings and who refused to accept his (clear) defeat in the US elections until the very end.

Financial Results for 2020

Continuing on a Course of Growth

With the acquisition of Kaiser Partner Financial Advisors at the beginning of 2020, the annual report is to be presented as a consolidated document for the first time. However, the acquisition has no significant impact on the financial position, income, and cash flows of the private bank.

In the reporting year marked by the COVID-19 pandemic, client assets under management increased overall by CHF 286 million, from CHF 4,693 million to CHF 4,979 million, representing an increase of 6%. The positive trend results from net inflow of new money in the amount of CHF 269 million and a positive market effect of CHF 17 million. It shows that the corporate values conveyed and the holistic wealth management model continue to be attractive in an environment marked by uncertainty. The high asset management ratio of 31% underscores the acceptance of our asset management expertise, which is based on an approach that strives for sustainability.

The private bank generated a consolidated net profit of CHF 2 million in a market environment that is persistently challenging and characterized by uncertainty in regard to ongoing developments in the pandemic, negative interest rates, high volatility in the financial markets, and rising regulatory and margin pressure.

Total gross income for the reporting period amounted to CHF 27.2 million, up 9% over the previous year's level. Thanks to the increase in client assets, income improved by 13% to CHF 16.6 million in commission and service transactions. Earnings from financial transactions even improved by 33% to CHF 5.6 million thanks to good income from currency hedging transactions. Only net interest income experienced a decrease, falling by CHF 0.8 million to CHF 4.6 million, which corresponds to a decline of 15% and is due to worldwide cuts in interest rates stemming from the pandemic.

Due to the expenses incurred in conjunction with the pandemic as well as investments in information technology and personnel, operating expenses increased by 20% to CHF 21.1 million compared to the previous reporting period. General and administrative expenses rose by CHF 1.5 million and personnel costs by CHF 1.9 million. At the end of 2020, Kaiser Partner Privatbank had 81 employees (71.65 FTEs).

The balance sheet total of Kaiser Partner Privatbank AG as of December 31, 2020, amounted to CHF 620 million, increasing by CHF 30 million or 5% in the reporting year. On the assets side, amounts due from banks fell by CHF 37 million (-20%), while amounts due from clients decreased by CHF 2 million (-3%). Amounts owed to clients increased by 5% from CHF 527 million to CHF 554 million.

Solid Equity Base

As of December 31, 2020, the equity base as defined by supervisory authorities increased by 8% to CHF 54.8 million, with this rise being primarily attributed to retained earnings. With a Tier 1 ratio of 19.4% after distribution of dividends, Kaiser Partner Privatbank continues to be on a very solid basis in terms of capitalization.

Principles of Action of Kaiser Partner Privatbank

- We guarantee the necessary expertise through our focus on services and markets in which we reach a critical size.
- Close cooperation within the teams and seamless integration of external experts creates added value for our clients.
- Investments in people, knowledge, and systems guarantee more quality, safety and security, and efficiency.
- We act with all our stakeholders on the basis of a responsible value system geared toward working together over the long term.

Our Expertise on the US Market

Asset managers who are registered with the U.S. Securities and Exchange Commission (SEC) have special needs and requirements. Kaiser Partner Privatbank AG offers them attractive solutions for responsibly investing the money of their US clients. We benefit from our long-standing cooperation with Kaiser Partner Financial Advisors Ltd. in Zurich, which manages taxed assets of US citizens and has been successfully operating in this area since 2009.

Partner for External Asset Managers and Funds

As a custodian bank, our business clients, which include external asset managers and administrators of international investment funds, have their portfolios managed by Kaiser Partner Privatbank AG. Our experts concentrate on best-in-class products. They do not offer their own products – which also ensures the clients get independent advice when using our advisory services. More and more often, our cooperative partnerships are implemented using digital channels and are subject to ongoing development that is carried out jointly.

Outlook for 2021: An Economic Recovery into a Greener Future?

A Boom to Follow the Recession

Following the sharp economic downturn last year, all signs for 2021 are clearly pointing toward growth. The upswing was delayed by the COVID-19 waves – either the second or third one, depending on how it is counted – and the slow start to the vaccination campaigns in many European countries at the beginning of the year. However, postponement of the recovery does not mean that it will not ultimately happen. Starting in the second quarter and as temperatures begin to warm, we can look forward to springtime also in the economic outlook. Due to the gradual lifting of restrictions, consumer demand, which was pent up for a long time, is likely to be unleashed in the coming months. In combination with the base effects, that is, the gloomy comparison to the previous year, growth rates are likely to pick up markedly starting in the summer at the latest. The overall growth rate of the global economy is likely to be well above the long-term average this year, with the United States likely to be one of the growth leaders. After the new President Joe Biden signed a third stimulus package totaling USD 1.9 trillion in March 2021, the COVID-19 aid now totals USD 5 trillion, corresponding to no less than 24% of the country's economic output. The fiscal injection of the US government is therefore quite a bit larger than that of other industrialized countries. As a result of the prospective economic boom, some are already forecasting risks associated with an overheated economy on the horizon. In any case, the dip in growth in the United States is expected to iron itself out by the end of the year at the latest.

Sustainability Now Indispensable

In the fight against climate change, the United States is also likely to want to play a bigger role again this year/decade. US President Biden sent important signals immediately after taking office by rejoining the Paris Climate Agreement and by halting construction of the Keystone XL oil pipeline to Canada. The energy sector is to be climate-neutral by 2035, and the entire country is to reach that point by 2050. In the next four years alone, USD 2 trillion are to be invested in green infrastructure. In terms of “green” ambitions, Europe is not too far behind. Flanked by the reconstruction fund Next-GenerationEU (NGEU), the EU budget of EUR 1.8 trillion adopted at the end of 2020 is the largest ever. Some 30% of the funds – more than ever before – are to go towards climate change mitigation. However, it is not just in the policymaking sphere that there is great momentum in matters of sustainability; the green revolution in the financial markets is also likely to continue. Whether green government bonds, impact investments, or thematic funds – investment strategies that take into account environmental and social responsibility factors as well as aspects of (good) corporate governance (ESG) are likely to see high capital inflows again this year. Kaiser Partner Privatbank will remain true to its long-standing tradition as a pioneer in responsible investing and will further bolster its commitment in the ongoing year.

Navigating Markets with High Valuations

Apart from the opportunity for the environment to get a breath of fresh air in the face of reduced economic activity, one positive side effect of COVID-19 was undoubtedly the increased interest of households in investing in the stock market. Stock speculation from people's home offices or directly from their couches also led to short-term increases in price that were not based in reality. However, involvement of ever larger sections of the population in the financial markets is generally to be viewed as a positive development – especially if it is sustainable and takes place with a view to long-term value enhancement. In 2021, we remain committed to responsible investment and the generation of added value for our clients in accordance with this guiding principle. In view of the high valuation levels in almost all asset classes and the extremely low interest rates for fixed-income securities, this mandate represents a major challenge as well as an incentive to meet it. Through innovative and forward-looking investment solutions, we will continue to strive for good risk-adjusted returns and to be ranked among the best in the industry. We are certain that we will continue to be a modern and reliable partner for both existing and new clients in 2021.

Notes to the Consolidated Financial Statement

Notes on Business Activities

Kaiser Partner Privatbank focuses on asset management for a sophisticated, international clientele that is primarily from the United States of America, the United Kingdom, Russia, and the DACH region (Germany, Switzerland, Austria).

Personnel

As of December 31, 2020, Kaiser Partner Privatbank had 81 employees (71.65 FTEs) (previous year: 82 employees, 68.9 FTEs).

Commission and Service Transactions

The primary activities of the Bank are asset management and investment advisory services. As a result, the majority of income from commission and service transactions can be attributed to commissions received in connection with securities trading on behalf of clients. Other important income components are securities management (including the investment fund business) and the brokerage of fiduciary investments.

Credit Transactions

As a matter of principle, the lending business is offered in conjunction with the asset management and investment business in return for Lombard collateral with application of margin requirements that are customary in banking. Only in exceptional cases does the Bank get involved in other ways.

Outsourcing

Kaiser Partner Privatbank procures comprehensive services from Avaloq Sourcing (Switzerland & Liechtenstein) Ltd as part of a business process outsourcing (BPO) arrangement. Avaloq Sourcing (Switzerland & Liechtenstein) Ltd processes all payment transactions and takes care of securities management. These activities are monitored at Kaiser Partner Privatbank.

Accounting and Valuation Principles

Principles

Bookkeeping, valuation, and accounting are in accordance with the provisions of the Liechtenstein Persons and Companies Act (*Personen- und Gesellschaftsrecht*; PGR), the Liechtenstein Banking Act (*Bankengesetz*, BankG) and the associated Liechtenstein Banking Ordinance (*Bankenverordnung*, BankV). The financial statement provides a true and fair representation of the financial position, income, and cash flows of Kaiser Partner Privatbank.

Consolidation Principles

With the acquisition of Kaiser Partner Financial Advisors Ltd as of January 1, 2020, the financial statement will be consolidated for the first time. As the acquisition has no significant impact on net assets or the financial position, income, or cash flows, the previous year's figures of Kaiser Partner Privatbank AG are presented at the individual level. The consolidated financial statement includes Kaiser Partner Privatbank AG in Vaduz and Kaiser Partner Financial Advisors Ltd. in Zurich. Kaiser Partner Financial Advisors Ltd. is fully consolidated. Assets and liabilities, as well as expenses and income, are recorded at 100%. Intercompany receivables and payables as well as expenses and income are offset against each other. For consolidation purposes, the accounting and valuation principles of Kaiser Partner Privatbank AG are also applied to the financial statement of Kaiser Partner Financial Advisors Ltd.

Recording of Business Transactions

All concluded business transactions are recorded on the balance sheet and income statement in accordance with established valuation principles. Each transaction is recorded and booked on the date of conclusion of the respective transaction.

Foreign Currencies

Amounts owed and due in foreign currencies are valued at the mean rate of exchange on the balance sheet date. The exchange rates prevailing on the transaction date are used for income and expenses. The exchange gains and losses resulting from the valuation were entered into the books, recognized in the income statement.

The following exchange rates were used for foreign currency conversion:

	12/31/2020	12/31/2019
USD	0.885100	0.966500
EUR	1.082079	1.085283
GBP	1.208206	1.281869

Cash and Cash Equivalents, Amounts Owed to and Due from Banks and Clients, and Securitized Liabilities

These are accounted for at nominal value. Valuation allowances are made for identifiable risks in accordance with the principle of prudence.

Impaired receivables, that is, receivables for which it is unlikely that the debtors will be able to meet their future obligations, are valued on an individual basis, and the impairment is covered by individual valuation allowances. Off-balance-sheet transactions such as firm commitments, guarantees, or derivative financial instruments are included in this valuation. Loans are classified as impaired at the latest when the contractually agreed payments of principal and/or interest are overdue by more than 90 days. Interest that is outstanding for more than 90 days is considered overdue. Loans are changed to interest-free if the possibility that the interest will be collected is so doubtful that accrual of this interest no longer makes sense.

Impairment is measured as the difference between the book value of the receivable and the expected recoverable amount, taking into account the counterparty risk and the net proceeds from valorization of any collateral. Individual valuation allowances are deducted directly from the corresponding asset items.

Bonds and Other Fixed-Interest Securities, Shares, and Other Non-Fixed-Interest Securities

Fixed-interest securities that are to be held until final maturity are valued according to the accrual method. Any premium or discount is accrued or deferred over the term until final maturity. Interest-related realized gains or losses from premature sale or repayment are accrued over the remaining term, that is, until the original final maturity. Interest income is included in the "Interest income" item. Equity and fixed-interest securities that are not held to maturity are valued at the lower of cost or market. Interest income is included in the "Interest income" item, dividend income in the "Current income from securities" item. Value adjustments are booked under the items "Depreciation of (or income from appreciation of) participating interests," "Shares in affiliated companies," and "Securities treated as assets."

Property, Plant, and Equipment, Tangible and Intangible Assets

Property, plant, and equipment are generally capitalized at cost less scheduled accumulated depreciation over their estimated useful lives based on economic criteria. Property, plant, and equipment are depreciated on a straight-line basis over a carefully estimated useful life of the assets (3 to 13 years). Real estate is depreciated over 50 years.

Objects used by the Bank as lessee within the scope of a finance lease are accounted for at their cash purchase value and depreciated over the respective term of the corresponding contract.

Acquired and internally generated intangible assets are accounted for if they will generate a measurable benefit for the company over several years. Expenses for establishment and expansion of business operations can be reported under intangible assets. Intangible assets are accounted for and valued according to the historical cost convention. The core banking system is amortized over 10 years. Other intangible assets are amortized on a straight-line basis over a carefully estimated useful life of four to five years.

The recoverability of tangible and intangible assets is assessed on each balance sheet date. If there are indications of impairment, the recoverable amount is calculated (impairment testing). If the book value exceeds the realizable value, an adjustment is made through unscheduled depreciations, recognized in the income statement.

Valuation Allowances and Provisions

Individual valuation allowances and provisions are made for all risks that can be identified on the balance sheet date in accordance with the principle of prudence. The valuation allowances are offset directly against the corresponding asset items. The provisions for taxes include accruals for taxes based on the results of the reporting year.

Provisions for General Banking Risks

Provisions for general banking risks are reserves formed as a precautionary measure to hedge against latent risks in the course of the Bank's business. Creation and release of provisions for general banking risks are reported separately on the income statement.

Off-Balance-Sheet Transactions

Off-balance-sheet transactions are reported at nominal value. Identifiable risks arising from contingent liabilities and other off-balance-sheet transactions are taken into account through the creation of provisions.

Derivative Financial Instruments

The replacement values of the individual contracts in derivative financial instruments are reported on a gross basis on the balance sheet and in the notes – positive and negative replacement values are not offset. The compensation account is reported on the balance sheet. Adjustments affecting income are shown on the income statement. All replacement values of contracts concluded for own account are reported. For client transactions, however, replacement values are only reported for over-the-counter (OTC) contracts and exchange-traded products if margin requirements are insufficient. Contract volumes and replacement values are shown under off-balance-sheet transactions and in the notes.

Changes in Accounting and Valuation Principles

The accounting and valuation principles have not changed since the previous year.

Risk Management

The fundamental aspects of risk management at Kaiser Partner Privatbank are an integral component of our general business policy within the framework of risk policy.

We thereby pursue the following objectives:

- Balanced, qualitative, and quantitative definition of risk-bearing capacity and risk appetite
- Creation of a risk culture that promotes risk-related controls and effective and efficient reporting
- Ensuring that Kaiser Partner Privatbank has a Risk Management organization with clear roles, responsibilities, rights, and duties
- Definition of a consistent risk management process, particularly the identification, measurement/assessment, control/limitation, and monitoring of all risks, and mitigation through appropriate measures
- Regulation of the reporting system, which allows the governing bodies of the Bank to obtain a comprehensive picture of the overall risk situation and fulfill their supervisory duties

Risk Management is based legally and operationally on the Liechtenstein Banking Act, the Liechtenstein Banking Ordinance, and the guidelines for risk management in accordance with the Annex to the Liechtenstein Banking Ordinance as well as on the Bank's own Articles of Association, Rules of Procedure, and internal guidelines and directives.

Counterparty Risks

As a matter of principle, the private bank only makes investments with counterparties with investment-grade ratings, which are restricted by limits and monitored daily. The creditworthiness of counterparties is continuously monitored by Risk Management.

Country Risks

Since Kaiser Partner Privatbank AG generally only grants secured loans to borrowers domiciled in countries of the Organization for Economic Cooperation and Development (OECD) and in Liechtenstein, the potential risk can be classified as low. Collateral is provided on the basis of prudently defined Lombard rates. With regard to country risks in the context of interbank transactions, the same criteria apply for selection of potential counterparties as set out under the "Counterparty Risks" section.

Trading and Use of Derivative Financial Instruments

Since Kaiser Partner Privatbank AG does not maintain a trading book, proprietary trading is only carried out on a small scale for the foreign exchange business. Derivative financial instruments are used exclusively within the scope of the client business or for hedging purposes, with both standardized and OTC derivatives being traded. Top-level Swiss and Liechtenstein banks serve as counterparties.

Market Risks

The risks in the banking book are primarily interest rate, currency, and exchange rate risks. Interest rate risks are controlled using strict rules regarding permitted maturity gaps. Interest rate swaps are concluded for larger maturity gaps. The risks are monitored using sensitivity limits. Interest rate sensitivity is a measure of the present value and income effect for the private bank resulting from a change in interest rates of 100 basis points. In addition, interest rate risks are monitored using active management of the balance sheet structure. In order to avoid incurring currency risks, investments are always made with matching currencies. Price risks are of subordinate importance due to the held-to-maturity approach.

Liquidity Risks

The private bank pursues a moderate investment strategy with a focus on constant availability of the necessary liquidity. Liquidity risks are monitored and controlled on an ongoing basis in accordance with the stipulations of banking law.

Personnel Risks/Remuneration Policy

Kaiser Partner Privatbank avoids taking disproportionately high risks by taking great care when hiring new employees. Great importance is attached to professional competence, moral integrity, and a consistent set of values. Remuneration policy is based on fixed non-performance-based remuneration without variable components. However, depending on the net income of Kaiser Partner Privatbank, an employee dividend may be paid by a related company.

To the General Meeting of
Kaiser Partner Privatbank AG, Vaduz

Zurich, 22 April 2021

Report of the statutory auditor on the consolidated financial statements

Opinion

We have audited the consolidated financial statements of Kaiser Partner Privatbank AG and its subsidiaries ("KPPB Group") which comprise the consolidated balance sheet as at 31 December 2020, the consolidated income statement and the consolidated statement of cash flow for the year then ended and the notes, including a summary of significant accounting policies and valuation principles.

In our opinion, the consolidated financial statements (pages 12 to 31) give a true and fair view of the financial position of KPPB Group as at 31 December 2020 and its financial performance for the year then ended in accordance with Liechtenstein law.

Basis for opinion

We conducted our audit in accordance with Liechtenstein law and International Standards on Auditing (ISA). Our responsibilities under those provisions and standards are further described in the "Auditor's responsibilities for the audit of the consolidated financial statements" section of our report.

We are independent of the KPPB Group in accordance with the provisions of Liechtenstein law and the requirements of the audit profession, as well as the International Code of Ethics for Professional Accountants (including International Independence Standards) of the International Ethics Standards Board for Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information in the annual report

The Board of Directors is responsible for the other information in the annual report. The other information comprises all information included in the annual report, but does not include the consolidated financial statements, the stand-alone financial statements, the consolidated annual report, the stand-alone annual report and our auditor's reports thereon.

Our opinion on the consolidated financial statements does not cover the other information in the annual report and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information in the annual report and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the consolidated financial statements

The Board of Directors is responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with the requirements of Liechtenstein law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the Board of Directors is responsible for assessing the ability of the KPPB Group's ability to continue as a going concern, disclosing, as applicable, matters related

to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate KPPB Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Liechtenstein law and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Liechtenstein law and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of KPPB Group's internal control system.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- ▶ Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the KPPB Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause KPPB Group to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and event in a manner that achieves fair presentation.

We communicate with the Board of Directors, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

The consolidated management report (pages 4 to 9) as at 31 December 2020 complies with Liechtenstein law and the articles of incorporation. Further, the consolidated management report accords with the consolidated financial statements and, in our opinion, does not contain any material inaccurate information.

We recommend that the consolidated financial statements submitted to you be approved.

Earnings from normal business activity	1,853	4,512
Income tax	-154	-468
Annual profit	1,698	4,044

Notes to the Financial Statement

Explanation on Business Activities

The explanations in regard to the consolidated financial statement (including disclosures about the company and risk management) also apply to the individual financial statement. For this reason, we do not repeat these explanations in the individual financial statement.

Accounting and Valuation Principles

With the following exception, the same principles and procedures apply as set out in the Notes to the Consolidated Financial Statement under the “Accounting and Valuation Principles” section.

In derogation from the accounting and valuation principles applied to the consolidated financial statement, shares in affiliated companies are carried at cost less any operationally necessary valuation allowances. The recoverability is assessed at least once a year.

Information on the Balance Sheet

(in CHF 1,000)

Overview of Collateral for Loans and Off-Balance-Sheet Transactions

Information on Off-Balance-Sheet Transactions

(in CHF 1,000)

Breakdown of Contingent Liabilities

We refer to the “Breakdown of Contingent Liabilities” table of the Notes to the Consolidated Financial Statement (no deviation to the individual financial statement).

Outstanding Derivative Financial Instruments

We refer to the “Outstanding Derivative Financial Instruments” table of the Notes to the Consolidated Financial Statement (no deviation to the individual financial statement).

Fiduciary Transactions

We refer to the “Fiduciary Transactions” table of the Notes to the Consolidated Financial Statement (no deviation to the individual financial statement).

Client Assets

	12/31/2020 in CHF million	12/31/2019 in CHF million
Type of client assets		
Assets with management mandate	1,518	1,525
Other client assets	3,438	3,168
Total client assets (including double counts)	4,956	4,693
Of which double counts	426	408
Net new money inflow/outflow	268	314

The previous year’s value of the Other client assets item was reduced by CHF 36 million to CHF 3,168 million, as these assets were no longer actively managed within the meaning of Annex 3 of the Liechtenstein Banking Ordinance (*Bankenverordnung*, BankV) as of year-end 2019. Accordingly, net new money inflow in 2019 was reduced from CHF 350 million to CHF 314 million.

Information on the Income Statement

(in CHF 1,000)

Net Income from the Trading Business

Please refer to the "Income from the Trading Business" table in the Notes to the Consolidated Financial Statement (no deviation to the individual financial statement).

To the General Meeting of
Kaiser Partner Privatbank AG, Vaduz

Zurich, 22 April 2021

Report of the statutory auditor on the financial statements

Opinion

We have audited the financial statements of Kaiser Partner Privatbank AG, which comprise the balance sheet as at 31 December 2020, the income statement for the year then ended and the notes, including a summary of significant accounting policies and valuation principles.

In our opinion, the financial statements (pages 38 to 40 and 42 to 53) give a true and fair view of the company's financial position as at 31 December 2020 and its financial performance for the year then ended in accordance with Liechtenstein law.

Basis for opinion

We conducted our audit in accordance with Liechtenstein law and the International Standards on Auditing (ISA). Our responsibilities under these regulations and standards are further described in the "Auditor's responsibilities for the audit of the financial statements" section of our report.

We are independent of the Company in accordance with the provisions of Liechtenstein law and the requirements of the audit profession, as well as the International Code of Ethics for Professional Accountants (including International Independence Standards) of the International Ethics Standards Board for Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide as a basis for our opinion.

Other information in the annual report

The Board of Directors is responsible for the other information in the annual report. The other information comprises all information included in the annual report, but does not include the consolidated financial statements, the stand-alone financial statements, the consolidated annual report, the stand-alone annual report and our auditor's reports thereon.

Our opinion on the financial statements does not cover the other information in the annual report and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information in the annual report and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation of the financial statements that give a true and fair view in accordance with the requirements of Liechtenstein law and the Company's articles of incorporation, and for such internal control as the Board of Directors determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the entity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors intends either to liquidate the entity or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Liechtenstein law and ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Liechtenstein law and ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made.
- ▶ Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the entity to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and event in a manner that achieves fair presentation.

We communicate with the Board of Directors, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other legal and regulatory requirements

The management report as at 31 December 2020 complies with Liechtenstein law and the articles of incorporation. The management report accords with the financial statements and, in our opinion, does not contain any material inaccurate information.

We further confirm that the financial statements and the proposed appropriation of profit complies with Liechtenstein law and the articles of incorporation. We recommend that the financial statements submitted to you be approved.
