Responsibility in Wealth

Remuneration

All services provided by Kaiser Partner Privatbank AG ("Bank") are, per account, subject to remuneration. If not otherwise agreed between Client and Bank, the Bank shall be remunerated according to this Fee Schedule.

Fees are invoiced or charged directly against the Client's account every quarter and consist of:

- The agreed package fee, plus external/third-party costs as separately shown on the Bank's invoices (e.g. broker or exchange fees, stamp duty or coupon tax, value added tax, etc.)
- The additional, event/service driven fees

The Client gets a separate written confirmation that shows the composition and amount of the remuneration, especially the agreed package fee.

This Fee Schedule enters into force on February 1, 2022.

The Bank reserves the right to make changes to the Fee Schedule at any time. The Client will be informed of such changes in writing or by other appropriate means. The changed Fee Schedule will enter into force within 30 days if the Client does not object within 30 days in writing.

Package "Trading Special"

In the Package "Trading Special", the Package Fee consists of the regulatory base fee, the basic fee and any ticket fees.

Regulatory base fee	CHF 100 / quarter
Basic fee¹	
The pricing tiers are based on the value of assets held at the Bank (in CHF or equivalent)	
up to 1.0 million	0.48%
up to 2.5 million	0.46%
up to 5.0 million	0.44%
up to 10.0 million	0.42%
up to 15.0 million	0.40%
from 15.0 million	0.38%
 Minimum	 CHF 500 / quarter
Ticket Fee²	CHF 150 / transaction

Services included in the basic fee

- Account fee (all currencies incl. CPC-metal accounts)
- Custody account fee
- Quarterly or monthly account statement and portfolio statement and, as requested, generic tax statement (annually)
- Turnover commission

¹ The volume for the calculation of the basic fee consists of all assets (e.g. cash, financial instruments, any time deposits and call money, etc....) held at the Bank. To allocate the volume in the above mentioned pricing tiers, the Bank calculates the effective volume at a specific date towards the end of each month. The quarterly basic fee payable consists of the three effective volumes in such quarter.

² The ticket fee is due for each transaction but transactions in money market investments (fiduciary call-money and time deposit), derivative, foreign exchange and precious metal instruments.

Additional event/service driven fees

For account, custody and investment-related services
