

Kaiser Partner Mobile Banking

Customizing the „My Banking“ Home Screen

The tiles on your „My Banking“ home screen are customizable. This step-by-step guide explains how to customize the tiles to optimally suit your needs.

4 The tiles that are currently visible on your „My Banking“ home screen are listed under „Current“. If you click on one of the functions listed under „Add new quick access“, a new tile with the corresponding function is added to the „My Banking“ home screen.

The order of the tiles can be adjusted by clicking on the ≡ icon via a drag-and-drop mechanism.

After you have selected and arranged the tiles, you can return to your „My Banking“ home screen. The changes are now visible.

In this example, the tiles „Scanner“, „Trade“, „New Payment“ and „Collaboration“ are displayed.

- 1 Log in to your **Kaiser Partner Mobile Banking app** with your contract number and password.
- 2 Press the ≡ icon at the top of your screen to open the main menu.
- 3 Select the option „More“- „Settings“, and then „Quick access“ to manage the tiles on your „My Banking“ home screen.
